

A stylized line drawing of a city skyline. On the left, a tall building with a pointed top, resembling the Chrysler Building, stands out. To its right, several other buildings of varying heights and widths are depicted. A small superhero figure, wearing a blue suit and a red cape, stands on the rooftop of one of the buildings. The background is plain white.

I am excited to share with you the i-Venger program we are running in school. I-Vengers is a child-friendly approach to teaching primary school students how to stay safe, kind, and responsible in the digital world. We have 6, year 5 children who are the i-Venger team. Using fun characters, stories, and age-appropriate activities, i-Vengers help children understand how to make smart choices when using technology at school and at home.

Think of i-Vengers as a team of “digital heroes” who guide children through online situations they may already be facing—such as using tablets, playing online games, watching videos, or communicating with others.

Last week the i-Venger team visited each class to introduce themselves and to play a quiz. We will keep you updated on their progress through the year.
